

How to Customize Survey Completion Page

When you make a survey with ProProfs, you can choose to redirect your user to a particular webpage when the survey is over or show a customized completion page. The completion page not only shows your custom message but a number of statistics based on the person's responses.

Here's how you can customize the completion page in a survey:

Step 1: Go to a survey's **Settings >> General** and select **Show completion page** for the option **On Survey Completion**.

The screenshot shows the ProProfs Survey Maker interface. At the top, there are navigation buttons: 'Create', 'Settings' (highlighted with an orange arrow), 'Send', 'Reports', 'Preview', and 'Save'. Below this is the survey title 'Customer Experience Survey'. A horizontal menu contains several tabs: 'General' (selected and highlighted with an orange arrow), 'Security', 'Scoring', 'Notifications', 'Theme', 'Integrations', 'Social Media', and 'Advanced'. Under the 'General' tab, there are two sections: 'Order' and 'Presentation'. In the 'Order' section, 'Order of Questions' is set to 'Do not shuffle questions' and 'Order of Answers' is set to 'Do not shuffle answer'. In the 'Presentation' section, 'Navigation Between Pages' has 'Yes' selected. 'Question Per Page' has 'All (Classic)' selected. 'On Survey Completion' has 'Show completion page' selected (highlighted with an orange arrow) and 'Redirect to webpage' is also visible.

Step 2: Selecting **Show completion page** will provide the option to **Customize Completion Page**.

Customize Completion Page:

<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ?	
Show social media & sharing links e.g. Facebook, Twitter etc	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ?
Show score	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ?
Show result	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ?
Show statistics	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ?
Show print	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ?
Show selected choices:	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ?
Show custom message	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No ?

We appreciate your valuable feedback.

Enabling this option displays the following settings:

- Show social media & sharing links such as Facebook, Twitter, etc.

Share this survey

- **Show score:** Displays the overall score of survey takers in case scoring was enabled.

Your Score

33 points

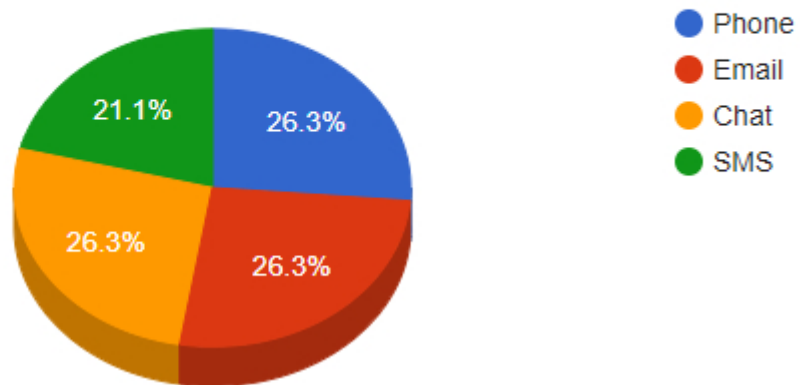

- **Show result:** Displays the result if the survey taken is a Scored survey.

Your Result

You are Super!

- **Show statistics:** Displays, in percentage, how popular each option is in a multiple-choice/checkbox question type.

Tell us your most preferred way of communication

- **Show print:** Allows the survey takers to take a print out of their results.

Thanks for your feedback.

Your Score

28 points

Your Result

You are Good!

- **Show selected choices:** Displays only those answer options that are selected by the survey takers.
- **Show custom message:** You can create a custom message that will be displayed when a survey taker submits the survey.

 Thanks for your feedback.

Your Score

28 points

Your Result

You are Good!
