

How to Shuffle Questions and Answers in a Survey

With ProProfs, you can shuffle the questions as well as the answers in a survey.

Here's how you can do that:

Step 1: Go to a survey's **Settings >> General**.

Under the **General** tab, locate the **Order** section:

1. Select the **order of questions** between the following choices: **Do not shuffle questions**, **Shuffle all questions**, and **Shuffle some questions**.
2. Select the **order of answers** between the following choices: **Do not shuffle answers** and **shuffle answers**.
